

## **East Berks**

So many motorcycling jobs we've been able to complete during these strange times, but with no events to enter or ride in, nothing is getting used or broken.

A few East Berks members are taking the opportunity to make changes to their bikes. Richard Collins decided that his G9 (500cc) would be a nicer bike if it was a 600cc, so has set about getting a suitable engine and slotting that into the G9 chassis. Ted Dawes is busy assembling another "barn find" and John Tinley has almost finished a lovely G80CS. We are making plans to get out on our bikes as soon as the rules allow, apart from the trips to support the local Kempton Jumble, Trials and Scrambles. Also, a road trip to Brittany as well as a trip to The French Alps during the summer months (more details as they come available). All we can do at present is obey the rules and pray that we get the vaccine soon.

Have a great 2021

**Ralph Brown**
